

When it comes to window coverings, the choices are infinite. Your final decision will depend on your personal style and the look you want to create, your needs for a particular space and what will work best in the space.

This "Project Planner" section of the website is designed to walk you through the range of decisions you face, from determining the style of window covering (drapes, blinds, sheers, cafe curtains, etc.) through choosing fabric and lining, and calculating fabric requirements to clarifying what we provide and what you must provide.

Remember: our experience and knowledge of drapery applications and hardware can help you to solve any practical problems you may encounter.
